PROFILE

M.Tech (Artificial Intelligence) candidate at IIT Jodhpur with experience in Machine Learning, Deep Learning, Generative AI, and Data Structures & Algorithms. Skilled in Python, SQL, Linux, and scalable application development, with industry experience at Ericsson and 250+ solved coding problems.

EXPERIENCE

Ericsson Global

Noida, India

Intern

02/2023 – 08/2023

- Worked on Ericsson's proprietary CIS (Customer Interaction Solution) platform in a Linux-based environment, supporting telecom service configuration and enterprise operations using Java-backed enterprise systems.
- Developed and configured customer-specific telecom service bundles for clients including Airtel.
- Gained hands-on experience with Linux servers, enterprise telecom workflows, and large-scale distributed systems.
- Contributed to live telecom projects for MTN and Airtel, strengthening problem-solving and production support skills.

EDUCATION

Indian Institute of Technology, Jodhpur

Jodhpur, Rajasthan, India

Master of Technology in Artificial Intelligence

2025 – 2027

Pranveer Singh Institute of Technology, Kanpur

Kanpur, UP, India

Bachelor of Technology in Computer Science and Engineering

2019 - 2023

SKILLS

Technical: Python, C, SQL, Data Structures & Algorithms, Object-Oriented Programming (OOP), Apache Spark, Langchain, Machine Learning, Deep Learning, Natural Language Processing (NLP), DBMS, Linux, NumPy, Pandas, Scikit-learn.

Tools: VS Code, Jupyter, Git and GitHub.

PROJECTS

Context-Aware Movie Recommender System

Jan 2026 – Apr 2026

- Engineered a scalable **hybrid recommendation engine** using **Apache Spark and ALS-based collaborative filtering** on **32M+ movie ratings**, integrating content-based features to enhance recommendation diversity and personalization.
- Developed a **Streamlit-based hybrid recommendation system with cold-start handling**, user profiling, and real-time feedback integration, evaluated using **Precision@K, Recall@K, and NDCG for recommendation quality**.

Tech Stack: Python, **Apache Spark**, **ALS**, Streamlit, Pandas, **Scikit-learn**, **TF-IDF**, Linux, **Recommender Systems**

VC Dimension Aware Sentiment Analysis

Jul 2025 – Nov 2025

- Developed an end-to-end sentiment analysis system using **Logistic Regression, Linear SVM, and TF-IDF**, achieving up to **90% accuracy** on benchmark datasets.
- Applied VC-Dimension theory to optimize TF-IDF feature selection, reducing overfitting, and deployed a Streamlit-based sentiment analysis application with Hugging Face integration for real-time predictions.

Tech Stack: Python, Scikit-learn, Streamlit, **Hugging Face**, **TF-IDF**, **Logistic Regression**, **SVM**, **Machine Learning**.

ACHIEVEMENTS

- Solved **250+ Data Structures and Algorithms problems** across coding platforms.
- **Qualified GATE CSE three times**, demonstrating strong Computer Science fundamentals.
- Built and Managed a **4,000+ Subscriber Youtube community**.
